Subject: Broken link on OSC page

Hi Marty and Gina!

There's a broken link due to a pesky little **space**. ☺ You'll see that the space in "release-emergency" is what's causing the issue

On this page:

http://epaossc.org/site/site_profile.aspx?site_id=11082

In this paragraph:

EPA is sharing information as quickly as possible with the public as experts work to evaluate any effects the spill may have on drinking water, public health, agriculture, fish and wildlife. Regular updates on the response for the public and the media are scheduled throughout the weekend. The latest updates and information on the response at available at: <http://www2.epa.gov/region8/gold-king-mine-release-emergency-response>.

The space causes the "%20" error:

<http://www2.epa.gov/region8/gold-king-mine-release-%20emergency-response>

Thanks!
